Docket No. 01-AFC-14

Applicant Status Report #2

On January 28, 2002, Staff conducted a workshop to discuss the docketed data responses and provide applicant the opportunity to request clarification to the second set of data requests. Prior to the workshop, applicant provided Staff with partial draft responses to the second set of data requests.

Of the 104 CEC data requests dated November 20, 2001, the applicant provided comprehensive responses to all but 10 data requests on December 19, 2001. Of the ten-remaining data requests, two were partially answered and responses are being developed for remainder. Applicant expects to docket all responses on or before March 15, 2002.

Of the second set of Soil & Water data request, REF docketed 44 of the 52 Data Requests on February 4, 2002. Responses to the remainaing eight data requests are being developed and will be docketed on or before February 18, 2002.

Applicant docketed a revised Emission Reduction Credit (ERC) offset package for the REF project. REF has identified sufficient ERC's for the project and is working with Placer County Air Pollution Control District to finalize the Preliminary Determination of Compliance for public review. Placer County Air Pollution Air District raised a concern with funding their analysis. Applicant believes the funding issues will be resolved on or before Feb 12, 2002 providing PCAPCD the opportunity to meet the current Committee schedule to issue the PDOC by mid March 2002. Applicant is working closely with PCAPCD to provide the necessary data for their analysis.

There was a meeting with Western on January 28, 2002 to evaluate the System Impact Study results to determine if there are any opportunities to minimize the impacts to the environment specifically along the east/west transmission corridor. Western, PG&E, SMUD and the ISO will meet to investigate this opportunity.

The PG&E Gas analysis was docketed on February 1, 2002. Applicant is working with PG&E to determine the impacts to the REF project. PG&E requested alternatives to

applicant's proposed natural gas line route. Both alternatives involve the Rio Linda project. With the uncertainty surrounding the Rio Linda's application process, which is in a suspended mode, applicant requested PG&E study the alternative with Rio Linda in and out of PG&E's proposed alternative. Applicant does not intend to drop it's proposed route until there is clear evidence of a better alternative.

Applicant continues to express its intent, as evidenced by the progress made over the past two weeks, to continue the CEC licensing process to preserve and enhance the asset value of the Roseville project. The submittal of Data Responses along with continuing the evaluation of the Roseville project by other state and federal agencies will continue to maintain schedule.

Dated: February 8, 2002

A handwritten signature in black ink, appearing to read "Allan J. Thompson", is written over a horizontal line.
